NOTE.—The two tables above (and other similar tables), must be read with some caution on account of changes of classification that were made before 1910, and at the end of 1930. From 1910 to 1930 the classification was substantially uniform. These tables are not affected by changes in classification made at the end of 1939.

METEOROLOGY.

SYNOPSIS OF THE WEATHER OVER TASMANIA FOR YEAR 1942.

The Rainfall throughout Tasmania during 1942 was slightly above average in the North and Central Plateau, approximately equal to the average in the Eastern and Western Divisions, and slightly below elsewhere. Generally, dry weather prevailed during the first four and last three months, whilst over average rainfall prevailed from May until the end of September. It was the wettest July on record at several stations over the Northern half of the State.

Mean Monthly Temperatures were very close to the average, or slightly below, during the first five months, and about normal, or slightly above, during the remainder of the period. A minor heat wave was experienced early in March. The early winter was particularly mild. Practically no snow was visible on the mountains at the end of June. The highest temperature recorded was 98·5 degrees at Launceston on 4th March, and the lowest 17·0 degrees at Miena on 27th and 30th July.

Atmospheric Pressure was below normal in January, May, and from July to September, and above average otherwise. Features of the year were the rapid movement of pressure systems in February, no less than seven anticyclones and six depressions being then associated with Tasmania, and the predominance of depressions during May, of which three were of the "closed curve" type.

Crops, Pastures, &c.—Throughout January fine weather was favourable for harvesting, and good crops were reported from most cereal districts. Stock were in good condition, but pastures were becoming dry and a good rain was required. The dry weather in February, March, and, to a lesser degree, in April, caused feed to become scarce and water supplies low, with detrimental effect upon stock. Early crops were also hampered, and the fruit season was somewhat later than usual. Relief came in May, when bounteous rains freshened pastures, replenished water supplies, and benefited crops generally. Cold temperatures in the Midlands, South, and Central Plateau, however, had a deterrent effect. June proved exceptionally mild, and these favourable conditions, coupled with ample rainfall over the Northern half of the State, and fair amounts elsewhere, led to an unusually good growth of crops and pastures in all districts considering the time of the year. Cold and wet conditions throughout July reduced growth almost to a standstill. The excessive rain, following heavy falls in May, and in parts of the North in June, caused the ground to become waterlogged in some Northern districts. As a result of moderate temperatures and satisfactory rainfall, signs of spring growth were evident in August, and with the sub-soil well saturated seasonal prospects were favourable. Unfortunately, September was so boisterous and inclement that crops were retarded. Stock, however, maintained improving condition, and satisfactory lambing was reported. October marked the commencement of a prolonged dry spell, which continued throughout November, and with only partial relief in December. The earlier promise of a very satisfactory season in many cases failed to materialise, and flax and other crops were only moderate. Nevertheless, reports from fruitgrowing districts indicate that apple, pear, and berry crops promise a fair average yield, and stock are mostly in good condition.

Monthly Weather Summaries.—JANUARY was a wet month in Northern and West Coastal areas, the excess ranging from 35 per cent to 50 per cent. The remaining divisions experienced an equally severe deficiency in rainfall, with the exception of the Central Plateau district, which was only slightly below normal. Only two general rains occurred on the 19th-20th and 24th-25th. The first of these produced widespread falls. Totals ranged from 1¼-3¼ inches in the Western Division, from 1-2½ inches in the North-West and Central Plateau, from ½-1 inch in the North and North-East, and from ¼-¾ inch elsewhere. The rain effectively quelled bush fires, which were becoming dangerous. Some useful falls accrued from the second occurrence, but the totals were much lighter. This was a windy month, and gales were frequent. At Hobart gale force was attained on 22 days, 14 of which occurred consecutively between the 4th and 17th. The maximum gust reached 63 miles per hour from the West on the 4th. Mean temperatures were slightly above average in the East and South, but below elsewhere. There were short-lived warm spells on the 4th, 7th, 19th, and 24th, and cold snaps on the 16th-18th, 26th, and 30th.

FEBRUARY, with the lowest average rainfall during the year, was even drier than normal throughout the Midlands, Eastern, South-Eastern, and Derwent Valley Divisions, where the district deficiencies were respectively 54 per cent, 37 per cent, 30 per cent, and 17 per cent. The distribution was patchy in the Northern Division, but despite isolated good falls the deficiency was about 36 per cent. The remainder of the State was more fortunate, the Western and Central Plateau Divisions having about normal rainfall. Three general rains occurred, these being for the 24 hours ended 9 a.m. on the 10th, the 20th, and 24th. The East and Midlands, however, only received real benefit on the 20th. Thunderstorms occurred on the 9th, 13th, and 19th. Temperatures were generally cool, departures from average ranging from ½ degree in the East to 2 degrees in the West. The only long-sustained warm spell was from the 6th-13th. A cold snap on the 24th was accompanied by a light fall of snow on the Central Plateau and Southern highlands. Occasional high temperatures increased the normal bush fire hazard, but the outbreaks were checked by good fire fighting

organisation and timely weather changes. Gales were less prevalent than for the previous five months. At Hobart, the wind attained gale force on 10 days. The highest gust was at the rate of 49 miles per hour from the West on 24th.

MARCH was another dry month, the East Coast faring worst with 39 per cent of the normal, while the Derwent Valley, with 80 per cent of the usual rainfall, was the most fortunate. In the other districts, the rainfall was about two-thirds of the average. The rains were associated with five depressions which passed over the State, two of them, on the 6th and the 11th, producing good falls in the West and parts of the Central Plateau and North-West, but mainly light elsewhere. Although the depression on the 16th was accompanied by general rain, the amounts recorded were light, but another on the 26th brought the best general rain of the month, with moderate registrations almost generally. The fifth depression was of combined tropical and Southern origin. Rain was general, except in the East. Temperatures were about normal with some warm days at the beginning of the month and cool conditions later. One or two damaging frosts occurred. On the whole, the wind was lighter than usual, the total monthly wind travel at Hobart being the lowest since August, 1941.

Rainfall for APRIL was under average fairly generally, except on parts of the West Coast, Derwent Valley, and Central Plateau, where slight excesses occurred. Deficiencies were considerable, particularly in the Midlands and on the East Coast between Swansea and Avoca. Parts of the South-East (from Sorell to Kempton) and of the Northern agricultural districts received only about one-half the average. Except on the West Coast, most of the month's rain fell in the first four days, but light showers occurred in the last week or so, particularly in the East and North-West. Mean temperatures were nearly 2 degrees below normal on the Central Plateau and from ½ to 1 degree below elsewhere. Many frosts occurred, particularly between the 14th and 22nd, and snow fell on the highlands on the 3rd, 4th, 14th, and 17th. Moderately warm spells were experienced on the 6th-9th and 25th-28th. Exceptionally disturbed conditions occurred during the opening week, fresh to very strong N.W. to W. winds sweeping the Island. Gale force was attained at Hobart on six of the seven days, the maximum gust—74 miles per hour from the W. at 6.50 a.m. on the 1st—being a record for April.

MAY was exceedingly wet. The rainfall was above average generally. Excesses were greatest in the Eastern Division, which received nearly three times the average. The Northern and South-Eastern Divisions received about 65 per cent above normal, and other Divisions an excess of 26 per cent to 42 per cent, with the exception of the West Coast Mountain Region, where the departure was 14 per cent above. The rain was evenly distributed throughout the month, the heaviest falls being recorded on the 3rd-7th, 13th, 18th, 21st, and27th. The heaviest 24-hour falls were recorded in the North-East up to 9 a.m. on the 27th, when St.Marys and Upper Scamander reported 7¼ and 6¼ inches respectively. Considerable rises occurred in North-Eastern and Eastern Rivers on that date. Mean temperatures were from 1 to 1½ degrees below average in the Midlands, South, and Central Plateau, but other Divisions showed little departure from normal. Frosts were fairly prevalent, particularly on the 8th and 25th, and snow fell on the highlands on the 7th and 15th. Owing to the prevalence of S.E. to E. weather, May was more than usually foggy, especially between the 25th and 27th. During the passage of a cyclonic "Low" from Western Victoria to the North-East of Tasmania on the 27th, very strong E. to S.E. winds and rough seas developed off the exposed coasts of the Island. Conditions were also disturbed during the first week from the 15th-18th, and on the 22nd-23rd. The maximum gust recorded at Hobart was 58 miles per hour from the W. on the 22nd.

JUNE proved a wet month over most of the Northern half of the State, and dry over the remainder. Excesses above average over that area ranged from 15 per cent to 35 per cent, whilst there was a deficiency of 17 per cent in the West Coast Mountain Region, and from 30 per cent to 35 per cent elsewhere. Mean temperatures were about 2 degrees above normal in the Midlands, and from 1 to 1½ degrees above elsewhere. Frosts were much in evidence inland—particularly during the first week and from the 23rd-26th. As a manifestation of the mildness of the winter, only a light sprinkling of snow occurred on the mountains on the 1st, 2nd, 28th, and 30th. Disturbed conditions were noticeably absent until the closing days of the month. At Hobart, gale force was attained on only five occasions. Fogs were more than usually prevalent, particularly on the 4th, 11th, 19th, and 23rd-26th.

JULY was a very wet month in all districts, except in districts East of the Derwent River and in parts of the Derwent Valley Division. It was the wettest July on record at Ulverstone, Low Head, Bridport, Campbell Town, Eddystone Point, St. Marys, and at Currie (King Island). District excesses above average were greatest in the Eastern (102 per cent), Northern (75 per cent), and Midlands (67 per cent) Divisions, whilst the West Coast Mountain Region and Central Plateau were from 20 per cent to 30 per cent above, and the Derwent Valley about 12 per cent above. Except for mainly fine spells in all but Western districts on 10th-13th and 24th-28th, and generally on 30th-31st, rain was recorded every day in almost all districts. The heaviest falls were registered on the 1st-4th, 15th-16th, and 19th-21st. During these periods considerable rises occurred in Northern and Eastern rivers. Several landslides also resulted in the North-West on the 15th from heavy rains. Frosts were very prevalent throughout, and snow fell on the highlands on many occasions, particularly on the 15th-17th. At Hobart, gale force was attained on eleven days, the maximum wind gust being 56 m.p.h. from the W.N.W. on the 21st.

Rainfall for AUGUST was over average in all divisions, except most of the Central, East, and Central Plateau and parts of the Derwent Valley and North-East. Excesses were about 43 per cent in the Northern Division, 35 per cent in the Midlands, and 25 per cent in the South-East. Elsewhere results were very close to the normal. Occasional showers, mostly very light, occurred during the first week, but thereafter rain fell almost every day in all districts. The heaviest falls were recorded on the 13th in the Northern Division, on the 29th in the East and Midlands, and on the 18th elsewhere. Some minor floodings occurred in Northern rivers. Mean temperatures were 1-1½ degrees above average in the Northern and Eastern Divisions, with little departure from normal elsewhere. Few frosts were experienced. Light snowfalls were fairly frequent on the highlands. As a result of moderate temperature and ample rainfall, signs of spring growth were prevalent. Strong winds, chiefly from N.W. to W., were very prevalent, particularly from the 17th-22nd. At Hobart, gale force was attained on ten days, the maximum gust being 52 miles per hour from the W. on the 18th. A thunderstorm on the night of the 20th was accompanied by severe lightning in Northern Tasmania, damage reported including the killing of a horse and splintering of outbuildings at Lilydale.

SEPTEMBER was windy throughout Tasmania, with rainfall 35-50 per cent above the average in the West Coast Mountain Region, Central Plateau, and Derwent Valley, and 15-20 per cent in the North and South-East. Elsewhere totals were close to or slightly below the average. Mean temperatures were about 1½ degrees above normal in the East and South-East, but close to average elsewhere. The prevalence of cloud, rain, and wind rendered conditions generally unfavourable for frost, which only developed to any great intensity during the anti-cyclonic periods 8-10th and 24-25th. Snowfalls were rather frequent on the highlands, especially on the 17th and 22nd-24th. Gales, chiefly from a N.W. to W. direction, were frequent throughout the State. At Hobart the wind travel was 16 per cent above average, and gale force was reached on 19 days. The periods 1st-7th and 16th-24th were consecutive days of gales, gusts exceeding 50 miles per hour being registered on seven occasions. On the 21st Hobart experienced a velocity of 66 m.p.h. from the W.N.W., and heavy squalls swept the Island. Disturbed sea conditions and strong S. to S.W. winds to gales developed around Tasmania on the 23rd. The inclement weather was detrimental to crops, but sufficient feed for stock was in evidence in most districts.

OCTOBER marked the beginning of a dry period. Except for a few places in the North-East, the rainfall was generally below the average. District deficiencies varied from 15 per cent to 20 per cent in the Eastern, Central Plateau, and Midlands Divisions, and from 30 per cent to 40 per cent elsewhere. Most of the rain was recorded during the first week, on the 9th and 19th-20th. Of these, the last-mentioned was the most serviceable. All districts received between ½ and 1½ inches, and as the rain was of a mild, soaking type with an absence of strong wind, pastures and crops generally derived immense benefit. Mean temperatures were about 1 degree above average on the Central Plateau, very close to normal in the Northern Division and about ½ degree below elsewhere. Moderate snowfalls occurred on the highlands on the 5th and on the 20th. Frosts were rather prevalent inland for the time of the year, especially on the 12th-14th. On the whole, October was much less disturbed than were the previous three months. Wind at Hobart attained gale force on seven days, with a maximum velocity of 50 miles per hour, from the N.W. on the 3rd. Fogs were rather prevalent on the 7th, 15th, and 28th, and some thunder was reported in Southern districts on the 30th.

Dry conditions continued during NOVEMBER. Excepting isolated areas near Scamander and Swansea, the rainfall was below the average generally. The distribution of rain was, on the whole, very uniform, districts deficiencies ranging from 50 per cent to 60 per cent in the North and Midlands, and from 35 per cent to 45 per cent elsewhere. Most of the rain was recorded during three periods, the 5th, 11th-12th, and 26th-27th. Whilst some scattered heavy falls occurred within the last-mentioned dates (notably 124 points at Swansea), more real benefit would have accrued from the soaking light to moderate falls registered in all districts up to 9 a.m. on the 5th. Mean temperatures were about 1 degree below average in the Western Division and slightly above elsewhere. A light fall of snow occurred on the Western and Southern highlands on the 11th and 15th, and a few frosts were reported inland. Except from the 7th-15th, when strong winds swept across Tasmania, settled conditions mostly prevailed during November. Throughout this disturbed period, the wind at Hobart attained gale force on all nine days, the maximum gust being 67 m.p.h. from the W.S.W. on the 15th. After a period of satisfactory growth, grain crops and pastures in most districts were showing signs of going off for want of rain.

The rainfall for DECEMBER was below average. District deficiencies were most severe in the Midlands, which received slightly more than half the average rainfall. The Eastern Division reported a shortage of only 7 per cent, whilst the remainder of the Island was from 15 per cent to 20 per cent below. Most of the rain fell during the last half of the month, substantial falls being recorded generally on the 18th-19th and 23rd-24th, and, to a lesser degree, on the 28th-29th. Although interfering with harvesting, and too late for the flax crop, these falls were of considerable benefit to grain crops, pastures, and water supplies, whilst the bush fire menace was temporarily removed. Mean temperatures were mostly from ½-1 degree above average. Boisterous weather was experienced on the 28th, when fresh to very strong N.W. to W. winds swept the Island. Hobart registered the maximum gust for the month on that date—61 miles per hour from the West.

The following is a summary of the Hobart monthly temperatures and rainfall for the year 1942.—

Month.	Mean Temperature.	Normal Temperature.	Rainfall (Inches).	Normal Rainfall (Inches).
January	61·6	61·8	0·83	1·85
February	61·3	62·2	0·84	1·52
March	59·1	59·4	1·29	1·77
April	54·6	55·1	1·24	1·93
May	49·2	50·7	3·30	1·82
June	48·0	46·9	1·33	2·22
July	46·1	45·9	1·80	2·13
August	48·7	48·1	2·26	1·85
September	52·4	51·0	2·35	2·06
October	53·8	54·1	1·25	2·30
November	58·4	57·1	1·00	2·43
December	59·5	60·1	1·93	2·13
Year	54·4	54·4	19·42	24·01

The highest maximum temperature was 91·0 degrees on the 2nd March, 1942, and the lowest minimum 34·3 degrees on 8th May, 1942. The highest maximum temperature on record is 105·2 degrees on 30th December, 1897, and the lowest minimum is 27·0 degrees on 18th July, 1866.

RAINFALL IN DISTRICTS, 1942.

The rainfall during the year for the various districts, as reported by telegraph, is summarised in the following table:—

District.	Mean District Rainfall, 1942.	Average for Previous Years.	Percentage Departure from Normal.
	in.	in.	
Northern	44·09	38·68	14 % above normal
West Coast	99·70	98·72	1 " " "
Central Plateau	42·82	40·06	7 " " "
Derwent Valley	26·92	29·47	8 " below normal
Midlands	19·34	22·34	13 " " "
East Coast	30·21	30·20	Nil
South-East	23·34	27·73	16 % below normal
King Island	39·25	33·64	17 " above normal

NOTE.—The percentage in the last column is designed to give an approximate measure of the proportion of farming and pastoral land, excluding Crown leases and licences, that is rented from the owner. Share farms are left out as being intermediate in their nature. The figure given is the percentage of rented land to the total made up of rented land, freehold occupation, and Crown land in process of purchase on time payment.

PRODUCTION: MANUFACTURING—TASMANIA.

YEAR 1941-42.

(Figures in parentheses are those for corresponding period of 1940-41.)

For statistical purposes in Australia a factory is an establishment engaged in secondary production, which uses power or employs more than three persons. Certain industries, however, such as construction works (buildings, wharves, bridges, and roads), threshing and slaughtering have never been included in the Australian schedule of manufacturing industries. In the year 1930-31, as the result of a resolution of the Conference of Statisticians, 1930, a new classification of industries was adopted; consequently care is needed when comparing class totals, as the groupings may not now be identically the same as in the years prior to 1930-31.

NUMBER OF FACTORIES.

During the year 1941-42 returns were collected from 994 (1002) factories, a decrease of 8 compared with the preceding year.

HANDS EMPLOYED.

The number of workers employed in factories on an average for the year 1941-42, 17,556 (15,839), showed a considerable increase on the number in the previous year, and was the greatest number of workers yet recorded. The increase in workers during 1941-42 comprised 1048 males and 669 females.

Some of the more important increases in total numbers of workers are shown in the following industries:—Newspapers, paper making, printing, &c., 1778 (1591); woollen tweed, and knitting mills, 2484 (2174); sawmills, 1754 (1570); jam, canning, and pickles, 1080 (899); and engineering, &c., 377 (299).

The following table gives a classification of hands employed according to the size of the factory in which they work:—

PERCENTAGE OF WORKERS IN FACTORIES.

Classification of Factory.	Tasmania.					Australia.
	1921.	1938-39.	1939-40.	1940-41.	1941-42.	1940-41.
1- 20 workers	35	34	32	29	28	19
21- 50 workers	27	15	14	15	13	14
51-100 workers	15	8	11	9	10	13
101 and over	23	43	43	47	49	54
Totals	100	100	100	100	100	100

During the year 1941-42 the percentage of all workers in factories with over 100 hands increased to 49 (47), while the average number of hands in this class of factory increased slightly to 472 (468), thus maintaining the steady upward trend of recent years.

The average number of workers for all factories in Tasmania during 1941-42 was 18·4, compared with 16·9 in 1940-41.

OUTPUT AND PRODUCTION.

The consideration of the activities of various industries requires differentiation between "value of output" or the gross value of goods delivered from the factory, and "value of production," or "net production," which is the value added to raw materials used in the factory in the process of manufacture. To obtain the actual value of the wealth so produced by factory processes the costs of manufacture must be as far as possible deducted from the value of output. Such costs are the value of raw materials used; wrappers and containers, the cost of fuel, power, light and water; tools replaced and repairs to plant; and depreciation. Wages, in relation to industry as a whole, are reckoned, not as a cost of manufacture, but as the share of the value of production accruing to labour from its co-operation with capital. At present, also, no reduction is made for depreciation owing to the impossibility of obtaining completely accurate and consistent figures.

The following table sets out the allotment of the gross value of output between these items for the last five years:—

	1937-38.	1938-39.	1939-40.	1940-41.	1941-42.
	£	£	£	£	£
Output	11,321,559	11,158,205	12,993,294	13,867,446 (a)	16,311,002 (a)
Raw material	4,854,787	4,613,978	5,410,648	6,188,288	7,460,857
All other costs (excluding wages and depreciation)	1,021,678	1,145,568	1,329,617	1,387,270	1,635,807
Net production	5,445,094	5,398,659	6,253,029	6,291,888 (a)	7,214,338 (a)
Labour cost	2,443,233	2,624,163	2,834,727	3,207,033	3,872,848
Unallotted balance	3,001,861	2,774,496	3,418,302	3,084,855	3,341,490
	%	%	%	%	%
Labour cost per cent of net production	44·9	48·6	45·3	51·0	53·7
	£	£	£	£	£
Net production per £100 labour cost	223	206	221	196	186

(a) Understated by approximately £725,000 (output) and £675,000 (net production), compared with 1939-40 and previous years (see note (d), Table No. 3).

The gross output for 1941-42 amounted to £16,311,000 (£13,867,000), and net production to £7,214,000 (£6,292,000). After deducting labour costs from net production, an "unallotted balance" of £3,341,000 (£3,085,000) remained for distribution among overhead charges and profits, together with an allowance for depreciation. Net production, which gives the best indication of the activities of the factories of the State, had for a number of years been valued at about £3,600,000, but with the onset of the business depression the values declined in 1931-32 to approximately £2,808,000, but increased in subsequent years to £7,214,000 during the year under review. For each £100 expended in salaries and wages, the average value of net production was £223 in 1937-38; £206 in 1938-39; £221 in 1939-40; £196 in 1940-41; and £186 in 1941-42. The aggregate cost of raw materials rose considerably during 1941-42, and amounted to £7,461,000 (£6,188,000), representing 46 (45) per cent of the total value of the output.

The following figures show the trend during recent years of net production in the chief industries:—

Industry.	Net Production.					Net Production per £100 of Labour Cost.
	1937-38.	1938-39.	1939-40.	1940-41.	1941-42.	1941-42.
	£	£	£	£	£	£
Lime, cement, &c. (a)	204,921	253,282	288,345	290,608	209,101	201
Sawmills	363,169	362,496	392,299	443,261	538,478	142
Metal extraction	1,540,271	1,163,179	(n)	(n)	(n)	(n)
Biscuits, confectionery, &c.	296,531	366,026	401,174	406,378	370,474	156
Jam, pulp, &c.	208,958	199,223	185,037	238,870	349,368	168
Woollen mills	362,202	416,609	650,738	817,967	957,458	215
Books, paper making, printing, &c.	388,065	450,250 (b)	619,000 (b)	840,593 (b)	1,179,926 (b)	266
Cycle and motor works	169,257	180,479	181,835	170,468	161,851	143
Heat, light, and power (excluding carbide)	655,982	707,882	771,800	175,688	147,702	316

(a) Including Carbide. (b) Including Paper Making. (n) Not available for publication.

As may be seen from the table, the value of net production in 1941-42 was considerably greater than in the previous year in the sawmills, woollen, jam, pulp, &c., and books, printing, &c., classes, the latter being chiefly due to paper making.

LABOUR COSTS.

The total amount of wages and salaries for the year 1941-42 was £3,872,848, compared with £3,207,033 in 1940-41. The average payment to all workers, both male and female, for the year under review, was £221 (£202).

FIXED CAPITAL.

At the end of 1941-42 the value of fixed capital investments stood at £11,997,000, compared with £11,786,000 at the end of the previous year. Of this fixed capital, £4,384,000 (£4,237,000) was represented by land and buildings, and £7,613,000 (£7,549,000) by plant and machinery.

(*a*) For details see Table No. 4. (*b*) For details see Table No. 5. (*c*) Available for Overhead Costs not included in the foregoing, for Interest on Capital (including Working Capital), and for Profit. (*d*) In 1940-41 and 1941-42 values for Heat, Light, and Power class, and total for all classes are understated by approximately £725,000 (output) and £675,000 (net production) compared with previous years, owing to valuation of Electricity and Gas at the Generating Station instead of at Point of Sale.

(*a*) The figure given here is an estimate of the total horsepower *applied to* electric generators, *not* the horsepower of electric current *generated*.
(*b*) Average for *whole* year.
(*c*) Output less Costs (other than Labour).
(*d*) Understated by approximately £695,000, compared with previous years, owing to valuation of Electricity at Generating Station instead of at Point of Sale.
(*e*) Understated by approximately £643,000, compared with previous years (see note (*d*) above).
(*f*) Valued on same basis as in 1940-41 (see notes (*d*) and (*e*) above).

(*a*) Collections at the Central Office (which for the whole of Australia amount to approximately one-third of the total) are not included.
(*b*) Actual Collections in Tasmania. The amount of duty collected in other Australian States on goods transhipped to Tasmania not included.
(*c*) Figures based on the assumption that the Customs and Excise Revenue per head in Tasmania, from 1913 onwards, bore the same proportion to the Customs and Excise Revenue per head for Australia that it did on the average for the nine years 1901 to 1909, for which years only full information is available. (The average per head, 1901 to 1909, in Tasmania was approximately 82 % of the average per head for Australia. Later years has been taken as approximately 80 %.
(*d*) Assuming similar proportion of Collections per capita as for Customs and Excise.
(*e*) Excluding Central Office Collections of Income, &c., Taxes.
(*f*) Including Flour Tax.

(a) Including Special Grants (Commonwealth) and Expenditure therefrom.

ACCUMULATED DEFICIENCY TO 30TH JUNE, 1942.

The figures in the above table do not provide a complete record of the Accumulated Deficiency in the State's finances, owing to the practice existing prior to the year 1933-34 of debiting Suspense Accounts with Revenue Charges. The following additional amounts should be added to the deficiency prior to 1934-35, as shown above, to arrive at the aggregate position:—

Accumulated Deficiency at 30th June, 1942.	£
Deficit as shown in above table	1,746,437
Losses on Returned Soldier Settlement	1,207,218
Loss on realisation of State Ships	61,260
Losses on Marrawah Tram	83,134
Hydro-Electric Depreciation Deficiency	47,211
Other	34,959
Total	£3,180,219

NOTE.—The above sum excludes suspended sinking funds and the non-provision of depreciation for replacement of certain capital assets of the State.

GOVERNMENT EXPENDITURE ON PUBLIC WORKS, 1941-42.

Actual Income = Gross income, less expenses of earning income. *Net Income* = Actual income, less concessional deductions (such as allowances for children, superannuation payments), certain gifts and subscriptions, and special income or wages tax paid in the previous year. *Taxable Income for Income Tax* = Net income, less statutory exemption and any rebates of income. *Taxable Income for Special Income Tax* = Actual income, less deduction for children, and any rebates of income. *Rebates of Income.*—As income from dividends of resident companies is not taxed in the hands of shareholders, such income from dividends is excluded from taxable income for income tax and special income tax purposes.

(*a*) Including periodic payments in reduction of principal.
(*b*) Much of the debt of Local Government Bodies is in the form of Instalment Debentures, which means a fixed periodic payment on account of interest and principal. For each debt, therefore, the payment on account of interest decreases and the payments on account of principal increases from year to year. These figures indicate the liability as at 30/6/42. (*c*) Charges in arrear, £279. (*d*) Not collected.

FRIENDLY SOCIETIES.

REPORT OF THE STATISTICIAN FOR THE YEAR 1941.

Hobart, 28th October, 1942.

SIR.

In accordance with Section 10 of the Friendly Societies Act, 1888, I have the honour to make the following report with respect to the year 1941.

(Note.—Figures in parentheses refer to the previous year—1940.)

Returns and Information.

District secretaries and secretaries of the larger lodges, together with all other persons who applied for them, were supplied with copies of the printed report and tables for 1940, showing the strength, progress and financial position of the societies.

The returns relating to the year 1941 were examined as customary for compliance or otherwise with the Friendly Societies Act and the registered rules of each society. The result was pleasing, inasmuch as few irregularities were disclosed in the conduct of financial transactions.

Societies.

At the end of the year 1941 there were 19 (19) distinct friendly societies, exclusive of two dispensaries in Tasmania. The special societies, which consist of members of one firm or institution or of residents of one locality, and have no branches, numbered 6 (6), with a benefit membership of 18·3 (16·2) per cent of all societies. There were 13 (13) general societies with 149 (153) branches for males, 25 (26) for females, and 6 (7) for juveniles. The decrease of 6 in the number of branches operating resulted from the absorption of 5 smaller branches, while 1 female branch of the I.O.O.F. Grand Lodge lapsed.

Membership.

The total membership at the end of the year 1941 was 24,722 (24,600), which comprised 23,087 (22,887) in adult male lodges, 1452 (1485) in adult female lodges, and 183 (228) juveniles, showing a decrease of 401 benefit members in general societies and an increase of 523 in special societies.

The number of initiations in general societies during 1941 showed a total decrease of 28 for both sexes. These numbered 531 (557) in male lodges and 104 (106) in female lodges.

The average age of male members for 1941 was 45·5 (45·3), a slight increase on the figure for the previous year.

The following table shows the increase of the average age of adult male members of general societies for the years 1927, 1937 and 1941:—

Year.	Average Age.	Year.	Average Age.	Year.	Average Age.
1927	40·1	1937	43·0	1941	45·5

The following table relating to male members of general societies, which form the most important section of the total membership, shows very clearly, in another manner, the drift into the older age-groups:—

Age Groups.	1920.		1930.		1941.		1941 Members Distributed on Basis of 1920.
	No.	Per Cent.	No.	Per Cent.	No.	Per Cent.	
16-19 years	1605	7·79	1463	6·60	548	2·97	1440
20-29 years	5445	26·42	5117	23·08	3021	16·34	4885
30-49 years	9859	47·85	9613	43·37	7283	39·39	8846
50 years and over	3696	17·94	5975	26·95	7636	41·30	3317
Total Members whose Ages were specified	20,605	100·00	22,168	100·00	18,488	100·00	18,488

Sickness and Mortality.

A marked decrease in sickness was experienced in friendly societies during 1941, the number of cases in adult male lodges being 4231 (5153), and the duration of sickness in days 272,956 (306,495). However, the average length of sickness per case increased to 64·5 (59·5) days. In female lodges the cases of sickness decreased to 240 (317), and the days of sickness fell to 15,892 (17,816), the average length of sickness, per case, being 66·2 (56·2) days.

Details of sickness over the past six years are given in the following table:—

Year.	Cases of Sickness.	Total Duration.	Average Length of Sickness.	Sick Payments.	Sick Pay per Financial Member.
	No.	Days.	Days.	£	£ s. d.
1936	5301	354,407	66·9	33,264	1 7 11
1937	5158	335,394	65·0	32,837	1 7 1
1938	4816	304,667	63·3	28,531	1 4 2
1939	5057	298,203	59·0	29,641	1 5 4
1940	5470	324,311	59·3	29,242	1 4 9
1941	4471	288,848	64·6	25,780	1 1 7

During 1941 there were 317 (303) adult male deaths in friendly societies and 15 (6) female, making a total of 332 (309). The number of deaths of registered wives was 135 (122), the funeral payments relating thereto being £1851 (£1698).

Funds.

Exclusive of dispensary stock, valued at £8420 (£5698), accumulated funds by the end of 1941 amounted to £515,390 (£509,751), and the capital per financial member was £21 11s. 0d. (£21 11s. 2d.). The rate of interest earned by the funds was 4·6 (4·4) per cent.

Receipts.

Net revenue for 1941 was £122,911, the chief items being members' contributions and levies £87,097 (£87,738); interest, dividends, &c., £23,559 (£22,608); and miscellaneous items £12,054 (£9765).

Expenditure.

Of the net expenditure of £114,550 (£110,052), the greater part was distributed in payment of benefits for members, which totalled £81,675 (£81,432). These comprised £25,780 (£29,242) sick pay, £32,735 (£30,941) medical expenses, and £23,160 (£21,249) funeral donations. Of the remaining expenditure, £21,203 (£18,217) represented cost of administration, and £11,672 (£10,403) miscellaneous payments.

Further details under the several headings enumerated may be found on pp. 5 to 18.

Effect of War on Friendly Societies.

In June 1940, at the request of the Societies, the Friendly Societies (War Service) Act was passed to assist Friendly Societies to pay death claims in respect of members dying on active service. The chief provisions of the Act are summarised in previous reports.

Up to the end of September, 1942, 1091 members were insured for a total death benefit of £71,341, but only nine claims for £590 had been paid.

Conclusion.

The last actuarial valuation of the societies' assets and liabilities was made at the end of 1934, and consideration will have to be given to a new one in the course of the next year.

Previous reports have stressed the necessity for fresh legislation to bring the Act up to date, and each year that passes adds to the difficulty of maintaining the friendly societies on a satisfactory financial basis.

H. J. EXLEY,
Government Statistician and Deputy Commonwealth Statistician.

The Hon. the Attorney-General,
Hobart.
